Dual Enrollment: Class Selection Tips

**LANGUAGE ARTS** – All students must take American Literature, typically during 11th grade/Junior year. If you register for Language Arts at college and take English 1101 and or 1102 which is usually called Advanced Composition, those classes will **ONLY** count for Senior Language Arts. They will **not** count for American Literature. You may take American Literature at college, however, some colleges require that you have prerequisites (usually English 1101, 1102) completed **before** you are allowed to take American Literature. Be sure and check the college website or the list of classes offered on gafutures.

**MATH** – You must have completed Algebra II or Accelerated Geometry at Parkview before you will be allowed to take any Math class at college. Also many colleges require that you take a Math placement test before you are allowed to register for a Math class. Check the college website for more instructions.

**SCIENCE** – If you want to register for your 4th required Science class at college – be careful of the course numbers and classes you take. If you take the 1st semester of Biology (26.01200), 1st semester of Chemistry (40.05100), or the 1st semester of Physics (40.08100)…..those classes **will not count** as your 4th Science. You may take the class and it will still go on your Parkview transcript, however, you will need to continue and take the 2nd semester of that same Science class. The 2nd semester class will count as your 4th required Science. Or you can decide to take another Science class on the gafutures course directory if you prefer, for example, Astronomy, Earth Science, Anatomy, etc. and those would count as your 4th Science.

**SOCIAL STUDIES** – You are required to take World History, US History and a semester of Economics, and a semester of American Government to graduate from Parkview. If you take Economics at college, you can take Intro to Economics, Global Economics, Microeconomics, or Macroeconomics (45.06100). If you want to earn credit for American Government, the class at college **must** be American Government (45.05700, 45.0A484) not Political Science, or any other Social Studies.
Social Studies – Because the required Gateway exam covers U.S. History – if you are a rising Junior/11th grader taking U.S. History for the first time, you are encouraged to take 2 semesters of U.S. History at all colleges except Georgia State University. If you are attending classes at GA State University and take Survey of U.S. History/History 2110 it will cover all the standards from the high school U.S. History course.

REMEMBER:

** Payment/Tuition for classes - Only courses listed on the gafutures course directory will be funded.

** 10th grade students- you must score a minimum of a 1200 on the SAT or 26 on the ACT to be eligible to take academic classes at a college/university. If you do not achieve this score, you would only be eligible to take CTAE (Technical) classes at a Technical college. Speak to your counselor before participating in dual enrollment as a 10th grade student.
