

Culinary Arts:

Would you like to learn to cook? Do you love home-cooked dinners? Would you like to surprise your mom/dad by cooking dinner? Well during your time in the Culinary Arts summer camp program you will learn to make some dinner items for your family. We will make fresh pasta, Alfredo sauce, Homemade Tortillas and Quesadillas. You will also learn to make pizza rolls from scratch, as well as soft pretzels and chocolate chip cookies. So join Chef Matthew Neal as he teaches you how to make these delicious foods and impress your friends and family.

Digital Media:

Learn to design and produce your very own t shirts! Digital Media camp is for the creative student excited by digital art and design. This summer, students will learn how to create unique illustrations and apply them to clothing. Students will learn the process of creating a design project from concept through completion using traditional drawing techniques and digital image creation with Adobe Illustrator and Photoshop.

Entrepreneurship:

Are you inspired to invent your own product or to be your own boss? Join the entrepreneurship summer camp and you will learn how! Students will learn about business ownership, developing a business idea, marketing, and pricing. Based on the popular TV show "Shark Tank", students will pitch their ideas to a team of "Shark" investors for a chance to win a prize! Come learn how to create your own income this summer!

Sports Science Camp:

The sports science camp provides students who are interested in the field of health science, physical activity and sports performance. This one week program, gives middle school students the opportunity to learn about new topics in sports science, career planning, and the many other opportunities in exercise science. Campers will experience different studies concerning muscle fitness, CPR education, physical activity, rehabilitation and skeletal system structure. If you are interested in a career in health science, this is the perfect camp for you!

Music Technology:

Come be a star at the Grayson Tech Summer camp! This year's Music Technology summer camp will be hosted by Grayson Tech's own Music Technology instructor Andre DeRamus! From music theory, all the way to the state of the art music studio software programs, your child will become the musician they've always wanted to be! Students will create their own professional music album! Students will experience and learn all the skills needed to create their own music professionally! Each student will leave with their own personal album to enjoy for the rest of their life!

Photography:

The students will be creating three different photo projects. Each project will highlight key AKS from Commercial Photo I, II, and III. Campers will begin learning about the history of Photography, darkroom equipment, and the developing process. Students will then transition to Commercial Photo II by learning the basic lighting techniques while gaining hands on experience with the studio lighting and equipment. The final project will be Photoshop based. The students will learn the basic tools and editing techniques to create a successful photo. Campers will need to bring a flash drive to save their creations. Students will also need to bring a sketch book to record their notes, Photoshop tutorials, and contact information. Bringing your own DSLR camera and SD card is advised but not required. All students will make and receive a professional photo for their personal portfolio as well as a framed black and white original picture to display.

Sports Medicine:

Are you interested in being a student athletic trainer or pursuing a career in Sports Medicine? The Student Athletic Trainer's Camp will give students valuable experience on topics such as CPR, Emergency Action Plans, hands on taping labs, heat illnesses and prevention, concussion management, and much more. For more information contact The Grayson Technical Program.

Veterinary Science:

Do you love animals and science? Have you ever dreamed of becoming a veterinarian or veterinary technician? This summer, the Grayson Tech Veterinary Tech Camp Program will fulfill your love of animals and science, and start your dream of becoming a veterinary professional. We will be doing a lot of fun activities, which include bandaging, suturing, and learning about different breeds. We will also be doing a few labs: a blood cell lab, chicken wing dissection, and creating a gastrointestinal model. Students should wear closed toed shoes and comfortable clothing. Students should also bring an AM and PM snack with them. There will be a dog present in the room for at least one day of camp. This workshop will last four days, so come join us and have some fun!

Video Production:

TV/Video Broadcasting Summer Camp Program, students will create their own TV Broadcast News show. Students will experience and learn all the skills needed to create a professional TV news show just like Fox 5, Ch. 2 and CNN. Students will get an overall feel of what it is like to be in a state of the art video broadcasting studio. Each student will leave with their own personal version of a TV News Broadcast that they have produced and created.
