Please feel free to contact John Harben of Atlanta Recycling Solutions at (678) 849-8084 with any questions. A separate pickup is available for large quantities. Atlanta Recycling Solutions is proud to announce that we have achieved our goal as a R2/ISO 14001 Certified Vendor for the electronic recycling industry. ISO 14001 is the family of standards related to environmental management. The R2 Standard requires downstream due diligence to ensure materials are handled properly throughout the chain of custody. R2 defines materials that can pose environmental concern, and outlines how these materials should be managed to ensure environmental and worker safety. Also, it prohibits the export of equipment and components containing focus materials to developing countries, unless the transaction is legal under both export and import laws and the receiving facility is state-of-the-art. R2 vendors are required to sanitize, purge, or destroy data on all hard drives and media, and require all recyclers to send materials to licensed and permitted facilities. Atlanta Recycling Solutions maintains a "Zero Landfill Policy."
