

Maxwell High School of Technology

Maxwell High School of Technology provides half day programs that prepare students to enter the service industry or a post-secondary institution by providing Career, Technical and Agricultural Education (CTAE) and training that encompasses valuable academic, technical, and employability skills. Students from all GCPS high schools may obtain three concentrated units of credit in a CTAE Pathway by successfully completing a Maxwell program. In addition, Maxwell offers embedded academic courses for graduation credit in language arts, math and science. All Maxwell programs offer **Board of Regents (BOR)** credit in one of the academic areas of language arts, math or science.
