

Lanier High School CDAT 9
Center for Design and Technology
2022-23

What is CDAT 9?

CDAT 9 offers Lanier High School 9th grade students a unique scheduling approach designed to support more active and STEM-focused learning. Please go to our website: www.LanierCDAT.org for more information.

How does the CDAT 9 schedule work?

CDAT 9 students are grouped together for 9th grade language arts, science, a technology elective*, and Longhorn Time. This unique schedule allows for more hand-on, experiential learning and cross-curricular projects.

All CDAT 9 students should register for one of the following electives: Introduction to Software Technology*, Foundations of Engineering, or Audio/Visual Technology.

***Students enrolled in Introduction to Software Technology will also receive embedded AP Computer Science Principles credit and will be prepared for the AP exam.**

How do I join?

On the CDAT website (www.LanierCDAT.org), you will see a link labeled **Click here to choose CDAT 9. Fill out the form in its entirety and submit.**

Do you have additional questions or need more information about CDAT 9?

See our CDAT website (WWW.LanierCDAT.org) for lots of information about CDAT 9 and the rest of our CDAT programs.

Please email Molly Stiltner molly.stiltner@gcpsk12.org for assistance or with any additional questions about CDAT 9 or other registration issues.
